

Medical Review

Payers and providers are under constant pressure from administrative shortages and labor-intensive manual review processes. Leveraging operational efficiency opportunities allow team members to practice at the top of their license and to enact a better care environment.

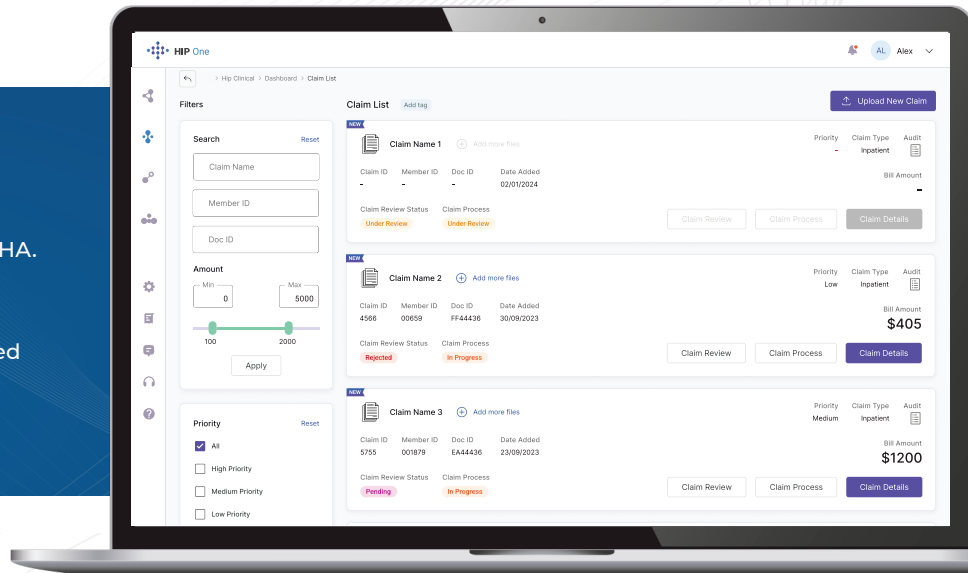

INSIGHTS

1.1
Million

Estimated nurse staffing shortage, projected by the AHA.

50%

Estimated productivity gained through administrative and operational automation.

Challenge

Manual medical review is a costly and inefficient process. It is often responsible for patient care delays.

Solution

Leveraging Gen AI, HIP One summarizes health records, acts as a clinical decision support system, and reveals insights specific to each use case.

Value

- 
Enhanced Productivity
 Automation and streamlined processes lead to significant productivity improvements (up to 50%), optimizing resource utilization.
- 
Enhanced Accuracy
 Significantly improves the accuracy of medical reviews and decisions.
- 
Improved TAT
 Helps to meet SLAs and improves member and provider experience.
